

NORTHERN NIHR BIOMEDICAL RESEARCH CENTRES' SHOWCASE

6 MARCH 2018
MANCHESTER
10AM – 4PM

Supported by the
Northern Health Science Alliance (NHSa)

Are you part of an innovative science-based healthcare company? Are you interested in translating innovative research into practice?

Join this unique opportunity to speak to the Northern NIHR Biomedical Research Centres and leading universities, on how they can support your translational research through:

- Funding partnerships
- Clinical research projects
- Access to clinical research facilities and expertise
- Evaluation and testing of products

This event, sponsored by the Northern Health Science Alliance and supported by the National Institute for Health Research (NIHR) is being delivered in collaboration with Leeds Teaching Hospitals NHS Trust, The University of Leeds, Manchester University NHS Foundation Trust, The University of Manchester, Newcastle upon Tyne Hospitals NHS Foundation Trust, Newcastle University, Sheffield Teaching Hospitals NHS Foundation Trust and The University of Sheffield.

Register your interest and save the date for:

- A showcase of Northern NIHR BRC strengths and opportunities from Centre leaders
- Updates on recent NIHR Infrastructure investment in the North
- Interactive industry/academic panel sessions on funding, collaboration and more
- Industry and academia collaboration success stories
- Senior networking opportunities with national funding bodies, policymakers, academics and industry

Discover the benefits of working with the North's life science and health innovation ecosystem as we explain the work of, and provide opportunities for collaboration with, the four NIHR Biomedical Research Centres based in the North at Newcastle, Sheffield, Manchester and Leeds.

Health innovation has been identified as a key sector by the Northern Powerhouse Independent Economic Review for growth and investment and the North's expertise in Life Science is referenced in the UK Life Science Industrial Strategy.

The NIHR BRCs in the North support commercial and investigator led translational and experimental medicine research in a range of areas including:

- Ageing and Long-Term Conditions (incl. dementia, hearing health, liver disease and neuromuscular disease)
- Cancer (advanced radiotherapy, prevention and early detection, and precision medicine)
- Musculoskeletal Diseases (incl. inflammatory arthritis, osteoarthritis and connective tissue diseases)
- Inflammatory Conditions (incl. respiratory, dermatology and skin and oral disease)
- Translational Neuroscience (neuroinflammation, cerebrovascular neurology and neurodegeneration)

The Northern BRCs are among 20 NIHR BRCs providing nationally leading expertise in clinical trials, health economics, informatics, data science, imaging and biomarker discovery platforms.
